

Homework Projects for the second half of Spring term

In addition to your daily tasks: reading, spellings and learn its, below are suggested projects that you can choose to do for this half term. They are linked to current topics or events.

- Write a snow poem - you might like to think about the fun, bad or beautiful effects of snow. Try to choose powerful descriptive language.
- Design a science experiment investigating how quickly snow melts in different temperatures.
- Design and make an ancient Greek style water clock that will measure one minute. (you may need to research this first).
- Use a travel brochure or internet to plan a holiday to modern day Greece. What transport and accommodation would you use? How much would it cost? What places would you visit and what activities would you do?
